

## **Editorial: Seacrest Country Day School**

By Staff Reports

Sunday, September 14, 2008

Progress rolls right along for Seacrest Country Day School in East Naples.

Or maybe "bounces" right along might be more appropriate.

Seacrest is rightfully excited these days about plans for a two-story, 25,000-square-foot building that will include a gym and science center, including labs for physics, biology and chemistry.

Once again, philanthropy is the key. This time it's an anonymous \$4 million gift driving the gym/science center to keep pace with Seacrest's pre-kindergarten through grade-12 curriculum.

Way to go, Seacrest, and may the additional \$1 million needed to complete the project be a slam dunk.
